

VOLK[®] SOLR[™]

EXPANDING
THE HORIZON
OF RETINAL
VISUALIZATION

Experience a new standard in retinal visualization with the Volk SOLR, a non-contact indirect ophthalmic surgical system designed to seamlessly integrate with the next generation of surgical microscopes. Built on Volk's legacy of optical excellence and trusted quality, the SOLR empowers surgeons with unparalleled clarity, reliable alignment, and effortless installation, allowing you to focus on what matters most: *your patients*.

The VOLK SOLR Advantage:

- + Unobstructed Visualization**
Shadow-free, crystal-clear retinal views for both the surgeon and the assistant
- + Precision Alignment**
Gravity-centered LPU for consistent and reliable retinal visualization
- + Efficient Workflow**
Seamless transitions between anterior and retinal views without needing to readjust
- + Rapid Installation**
Microscope-specific mounting kits for quick and easy setup
- + Increased Confidence**
Empowering surgeons with the clarity and efficiency they need for optimal surgical outcomes

A Focus on Compatibility with the Next Generation of Microscopes

MANUFACTURER	MICROSCOPE	MOUNTING KIT	MANUFACTURER	MICROSCOPE	MOUNTING KIT
Alcon	LuxOR Revalia	12640	Takagi	OM-9	12645
Haag-Streit / Moller-Wedel	HI-R NEO 900	12161		OM-19	12650
	M822	12171	Topcon	OMS-800 Standard	12162
Leica	M844, Proveo 8	12160	Zeiss	OPMI Lumera I, 300 Advanced, 700	11408
				OPMI VISU 150, 160, 200, 210	12163

This table represents a selection of compatible models. For a complete list and to confirm your microscope's compatibility, please contact Volk.

Lose the Shadows, Maximize the View

Our innovative expanded condensing lens ensures an unobstructed path throughout the entire optical and illumination system, delivering shadow-free, crystal-clear views for both the surgeon and the assistant. This enhanced visibility empowers precise, confident surgical outcomes, upholding the Volk standard of optical excellence.

Graphic based on the optical schematic of Topcon OMS-800

WIDE ANGLE ACS® LENS

102°/120°
FIELD OF VIEW IMAGE MAG
0.43x
19 mm
LENS DIAMETER

- + Widest field of view, allowing visualization of the retina approaching the ora serrata
- + Superior clarity and depth of field from the macula to the peripheral retina

MID-FIELD ACS® LENS

80°/95°
FIELD OF VIEW IMAGE MAG
0.74x
19 mm
LENS DIAMETER

- + Higher magnification lens for clearest views of the macula
- + Intermediate field of view allows visualization to the equator

SMALL WIDE ANGLE ACS® LENS

95°/112°
FIELD OF VIEW IMAGE MAG
0.42x
13 mm
LENS DIAMETER

- + Smallest diameter lens, ideal for patients with small pupils or deep seated eyes, and pediatric cases
- + Provides a very wide field of view, while maintaining superior clarity and depth of field
